Nassau County SLAMM Tool Example Parcels

Figure. All marsh sites considered in Nassau County

Site1: Dosoris Pond/West Pond

Dosoris Pond is a lake near to East Island and East Beach. It is also close to West Pond and Welwyn Preserve County Park. The area is a hotspot for bird watching. Currently the only marsh occurs at West Pond, to the southwest of Dosoris Pond.

Site 5: Marine Nature Study Area

The Marine Nature Study Area is a 52-acre preserve located in Oceanside devoted to environmental education and natural history. This area provides an outdoor laboratory for elementary and secondary schools to study salt marsh ecology, marine conservation practices, earth science, and marine biology. The Area also provides opportunity for research in marsh ecology and management to local college students and opportunity for art and photographic studies.**www.mnsa.info**
