Habitat Restoration & Stewardship Work Group September 14, 2021 WebEx Meeting (*details below*)

Agenda

FY21 LISS HRSWG Work Plan The Long Island Sound Study has tasked the co-chairs of each of the LISS work group to develop an annual work plan that identifies the type of support needed to advance the work group's priorities and desired outcomes in the upcoming FY2022 funding cycle (October 1, 2022 - September 30, 2023). The work plans are requested by October 1, 2021. This will enable the Management Committee to fully consider the needs and priorities of the work groups in planning and developing its FY22 Long Island Sound Study Work Plan and Budget.O'Neill/Yamalis11:00 amLISS Communications Plan-Overview Marstel-Day, LLC is working with LISS partners to develop a Communications Plan that will spur Sound residents and other stakeholders to action for the protection of the Sound's resources. As part of the research phase of this project, we are reaching out to the different Work Groups (as well as other estuary programs across the country, among other stakeholder groups) to uncover what they think is working well from a communications, outreach, and engagement (COE) standpoint, what could be improved, any best management practices from other organizations worthy of highlighting, etc., and eventually share those insights with the LISS team via the Communications Plan. During this interactive one-hour conversation (with approximately 15 minutes at the end for questions from you to us), we will look to you for your input on those items, as well as to get a better understanding of what the Habitat Restoration and Stewardship Work Group does in general.Imagement formations the stewardship Work Group does in general.11:00 amEnd MeetingEnd MeetingImagement formation of the protection of the specee in set the state of the protection of the specee in set the state of the specee in set the state of th	9:00 am	Welcome/Introductions/Logistics	O'Neill/Yamalis
